

CENTRE FOR SUSTAINABLE MODERN ENERGY EXPERTISE.

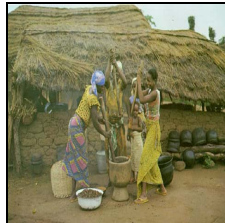

IMPROVE LIVELIHOODS BY SUPPORTING THE ONGOING EFFORTS TO ERADICATE THE USE OF: THREE STONE STOVES, HUMAN ENERGY AND KEROSENE WICK LAMP IN TANZANIA

More than 85 % of the Tanzanians depend on the following inferior energy sources and technologies.

Three stones stove and wick lamp

Grains pounding

Firewood transportation

Human energy for farming

Support greater use of the following modern energy technologies

Improved firewood-oko stove

Biogas

Electricity from sun, wind small hydro. biofuels etc

Farm with Animals plough or tractor powered by biofuels

LET US CHANGE TO

SOME REALITIES ABOUT ENERGY SITUATION IN TANZANIA TODAY.

1. More than 85 percent of all energy consumed in Tanzania is from firewood, charcoal and human energy.
2. More than 85 percent of the Tanzanians have no access to electricity.
3. Each day, a village woman spends between three to six hours collecting firewood.
4. Each day, more than 500 hectares of natural forest are lost due to charcoal and firewood harvest.
5. Each year, more than 50,000 Tanzanians die due to inhaling smoke while cooking with three stone stoves.

LET US COLLABORATE TO ENABLE THE MAJORITY OF TANZANIANS TO ACCESS MODERN ENERGY SERVICES IN ORDER TO:

- Reduce poverty.
- Improve Education quality.
- Improve health quality.
- Empower Women.
- Conserve the Environment
- Conserve Forests.
- Increase employment and income generation.
